Cmdlet: Add-AppvServerConnectionGroupPackage

Synops

```
Add-AppvServerConnectionGroupPackage [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [[-AppvServerPackage] <PackageVersion>] [-
PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-
PackageVersionID <guid>] [-Optional] [-UseAnyPackageVersion] [-Order <int>] [-WhatIf]
[-Confirm] [<CommonParameters>]
```

```
Add-AppvServerConnectionGroupPackage [-ConnectionGroupName] <string> [[-
ConnectionGroupVersion] <int>] [[-AppvServerPackage] <PackageVersion>] [-
PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-
PackageVersionID <guid>] [-Optional] [-UseAnyPackageVersion] [-Order <int>] [-WhatIf]
[-Confirm] [<CommonParameters>]
```

```
Add-AppvServerConnectionGroupPackage [-ConnectionGroupID] <guid> [[-
ConnectionGroupVersionID] <guid>] [[-AppvServerPackage] <PackageVersion>] [-
PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-
PackageVersionID <guid>] [-Optional] [-UseAnyPackageVersion] [-Order <int>] [-WhatIf]
[-Confirm] [<CommonParameters>]
```

Syntax

```
Add-AppvServerConnectionGroupPackage [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [[-AppvServerPackage]
<PackageVersion>]
    [-PackageName <string>] [-PackageVersion <string>] [-
PackageID <guid>] [-PackageVersionID <guid>] [-Optional] [-
UseAnyPackageVersion] [-Order
    <int>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Add-AppvServerConnectionGroupPackage [-ConnectionGroupName]
<string> [[-ConnectionGroupVersion] <int>] [[-AppvServerPackage]
<PackageVersion>]
    [-PackageName <string>] [-PackageVersion <string>] [-
PackageID <guid>] [-PackageVersionID <guid>] [-Optional] [-
UseAnyPackageVersion] [-Order
    <int>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```

Add-AppvServerConnectionGroupPackage [-ConnectionGroupID] <guid>
[[-ConnectionGroupVersionID] <guid>] [[-AppvServerPackage]
<PackageVersion>]
    [-PackageName <string>] [-PackageVersion <string>] [-
PackageID <guid>] [-PackageVersionID <guid>] [-Optional] [-
UseAnyPackageVersion] [-Order
    <int>] [-WhatIf] [-Confirm] [<CommonParameters>]

```

Description

Parameters

Parameter :**AppvServerConnectionGroup**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**AppvServerPackage**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupID**

Required	true
Position	0

Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupName**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupVersion**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupVersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Optional**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Order**

Required	false
Position	Named
Default value	
Accept pipeline input?	false

Accept wildcard characters?	
-----------------------------	--

Parameter :**PackageID**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageName**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageVersion**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageVersionID**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**UseAnyPackageVersion**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Get-AppvServerConnectionGroup

Synops

Get-AppvServerConnectionGroup [[-Name] <string>] [[-Version] <int>]
[<CommonParameters>]

Get-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID] <guid>]
[<CommonParameters>]

Syntax

Get-AppvServerConnectionGroup [[-Name] <string>] [[-Version] <int>] [
<CommonParameters>]

Get-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID] <guid>]
[<CommonParameters>]

Description

Parameters

Parameter :**GroupID**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	false
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Get-AppvServerPackage

Synops

Get-AppvServerPackage [[-Name] <string>] [[-Version] <string>]
[<CommonParameters>]

Get-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>]
[<CommonParameters>]

Syntax

Get-AppvServerPackage [[-Name] <string>] [[-Version] <string>]
[<CommonParameters>]

Get-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>]
[<CommonParameters>]

Description

Parameters

Parameter **:Name**

Required	false
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter **:PackageID**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Cmdlet: Get-AppvServerPackageDeploymentConfiguration

Synops

Get-AppvServerPackageDeploymentConfiguration [-Name] <string> [[-Version] <string>] [<CommonParameters>]

Get-AppvServerPackageDeploymentConfiguration [-AppvServerPackage] <PackageVersion> [<CommonParameters>]

Get-AppvServerPackageDeploymentConfiguration [-PackageID] <guid> [[-VersionID] <guid>] [<CommonParameters>]

Syntax

Get-AppvServerPackageDeploymentConfiguration [-Name] <string> [[-Version] <string>] [<CommonParameters>]

Get-AppvServerPackageDeploymentConfiguration [-AppvServerPackage] <PackageVersion> [<CommonParameters>]

Get-AppvServerPackageDeploymentConfiguration [-PackageID] <guid> [[-VersionID] <guid>] [<CommonParameters>]

Description

Parameters

Parameter :**AppvServerPackage**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**PackageID**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Cmdlet: Get-AppvServerPackageUserConfiguration

Synops

```
Get-AppvServerPackageUserConfiguration [-Name] <string> -Group <string>
[<CommonParameters>]
```

```
Get-AppvServerPackageUserConfiguration [-AppvServerPackage] <PackageVersion> -
Group <string> [<CommonParameters>]
```

```
Get-AppvServerPackageUserConfiguration [-PackageID] <guid> [[-VersionID] <guid>] -
Group <string> [<CommonParameters>]
```

```
Get-AppvServerPackageUserConfiguration [[-Version] <string>] -Group <string>
[<CommonParameters>]
```

Syntax

```
Get-AppvServerPackageUserConfiguration [-Name] <string> -Group
<string>  [<CommonParameters>]
```

```
Get-AppvServerPackageUserConfiguration [-AppvServerPackage]
<PackageVersion> -Group <string>  [<CommonParameters>]
```

```
Get-AppvServerPackageUserConfiguration [-PackageID] <guid> [[-
VersionID] <guid>] -Group <string>  [<CommonParameters>]
```

```
Get-AppvServerPackageUserConfiguration [[-Version] <string>] -
Group <string>  [<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerPackage**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Group**

Required	true
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**PackageID**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Cmdlet: Grant-AppvServerConnectionGroup

Synops

```
Grant-AppvServerConnectionGroup [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [-Groups] <string[]> [-WhatIf] [-Confirm]
[<CommonParameters>]
```

```
Grant-AppvServerConnectionGroup [-Name] <string> [[-Version] <int>] [-WhatIf] [-
Confirm] [<CommonParameters>]
```

```
Grant-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID] <guid>] [-WhatIf] [-
Confirm] [<CommonParameters>]
```

Syntax

```
Grant-AppvServerConnectionGroup [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [-Groups] <string[]> [-WhatIf] [-
Confirm]
    [<CommonParameters>]
```

```
Grant-AppvServerConnectionGroup [-Name] <string> [[-Version]
<int>] [-WhatIf] [-Confirm]    [<CommonParameters>]
```

```
Grant-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID]
<guid>] [-WhatIf] [-Confirm]    [<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerConnectionGroup**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)

Accept wildcard characters?	
-----------------------------	--

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**GroupID**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Groups**

Required	true
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Grant-AppvServerPackage

Synops

Grant-AppvServerPackage [-AppvServerPackage] <PackageVersion> [-Groups] <string[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Grant-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>] [-Groups] <string[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Grant-AppvServerPackage [-Name] <string> [[-Version] <string>] [-Groups] <string[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Syntax

Grant-AppvServerPackage [-AppvServerPackage] <PackageVersion> [-Groups] <string[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Grant-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>] [-Groups] <string[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Grant-AppvServerPackage [-Name] <string> [[-Version] <string>] [-Groups] <string[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Description

Parameters

Parameter :**AppvServerPackage**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Groups**

Required	true
Position	2
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**PackageID**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Import-AppvServerPackage

Synops

Import-AppvServerPackage [-PackagePath] <string> [-WhatIf] [-Confirm]
 [<CommonParameters>]

Syntax

Import-AppvServerPackage [-PackagePath] <string> [-WhatIf] [-Confirm] [
<CommonParameters>]

Description

Parameters

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackagePath**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: New-AppvServerConnectionGroup

Synops

New-AppvServerConnectionGroup -Name <string> [-Priority <uint32>] [-WhatIf] [-Confirm] [<CommonParameters>]

Syntax

```
New-AppvServerConnectionGroup -Name <string> [-Priority <uint32>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Description

Parameters

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Priority**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Whatlf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Publish-AppvServerConnectionGroup

Synops

```
Publish-AppvServerConnectionGroup [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Publish-AppvServerConnectionGroup [-Name] <string> [[-Version] <int>] [-WhatIf] [-
Confirm] [<CommonParameters>]
```

```
Publish-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID] <guid>] [-WhatIf] [-
Confirm] [<CommonParameters>]
```

Syntax

```
Publish-AppvServerConnectionGroup [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [-WhatIf] [-Confirm]
[<CommonParameters>]
```

```
Publish-AppvServerConnectionGroup [-Name] <string> [[-Version]
<int>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Publish-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID]
<guid>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerConnectionGroup**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**GroupID**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Publish-AppvServerPackage

Synops

Publish-AppvServerPackage [[-Name] <string>] [[-Version] <string>] [-WhatIf] [-Confirm] [<CommonParameters>]

Publish-AppvServerPackage [-AppvServerPackage] <PackageVersion[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Publish-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]

Syntax

Publish-AppvServerPackage [[-Name] <string>] [[-Version] <string>] [-WhatIf] [-Confirm] [<CommonParameters>]

Publish-AppvServerPackage [-AppvServerPackage] <PackageVersion[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Publish-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]

Description

Parameters

Parameter :**AppvServerPackage**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	false
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**PackageID**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Remove-AppvServerConnectionGroup

Synops

Remove-AppvServerConnectionGroup [-Name] <string> [[-Version] <int>] [-Force] [-WhatIf] [-Confirm] [<CommonParameters>]

Remove-AppvServerConnectionGroup [-AppvServerConnectionGroup] <SerializableConnectionGroup> [-Force] [-WhatIf] [-Confirm] [<CommonParameters>]

Remove-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID] <guid>] [-Force] [-WhatIf] [-Confirm] [<CommonParameters>]

Syntax

```
Remove-AppvServerConnectionGroup [-Name] <string> [[-Version] <int>] [-Force] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Remove-AppvServerConnectionGroup [-AppvServerConnectionGroup] <SerializableConnectionGroup> [-Force] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Remove-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID] <guid>] [-Force] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerConnectionGroup**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Force**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**GroupID**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Remove-AppvServerConnectionGroupPackage

Synops

```
Remove-AppvServerConnectionGroupPackage [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [[-AppvServerPackage] <PackageVersion>] [-
PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-
PackageVersionID <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Remove-AppvServerConnectionGroupPackage [-ConnectionGroupName] <string> [[-
ConnectionGroupVersion] <int>] [[-AppvServerPackage] <PackageVersion>] [-
PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-
PackageVersionID <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Remove-AppvServerConnectionGroupPackage [-ConnectionGroupID] <guid> [[-
ConnectionGroupVersionID] <guid>] [[-AppvServerPackage] <PackageVersion>] [-
PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-
PackageVersionID <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Syntax

```
Remove-AppvServerConnectionGroupPackage [-
AppvServerConnectionGroup] <SerializableConnectionGroup> [[-
AppvServerPackage] <PackageVersion>]
    [-PackageName <string>] [-PackageVersion <string>] [-
PackageID <guid>] [-PackageVersionID <guid>] [-WhatIf] [-Confirm]
    [<CommonParameters>]
```

```
Remove-AppvServerConnectionGroupPackage [-ConnectionGroupName]
<string> [[-ConnectionGroupVersion] <int>] [[-AppvServerPackage]
<PackageVersion>]
    [-PackageName <string>] [-PackageVersion <string>] [-
PackageID <guid>] [-PackageVersionID <guid>] [-WhatIf] [-Confirm]
    [<CommonParameters>]
```

```
Remove-AppvServerConnectionGroupPackage [-ConnectionGroupID]
<guid> [[-ConnectionGroupVersionID] <guid>] [[-AppvServerPackage]
<PackageVersion>]
```

[-PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-PackageVersionID <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]

Description

Parameters

Parameter :**AppvServerConnectionGroup**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**AppvServerPackage**

Required	false
Position	2
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupID**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupName**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupVersion**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupVersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageID**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageName**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageVersion**

Required	false
----------	-------

Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageVersionID**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Remove-AppvServerPackage

Synops

Remove-AppvServerPackage [-Name] <string> [[-Version] <string>] [-WhatIf] [-Confirm] [<CommonParameters>]

Remove-AppvServerPackage [-AppvServerPackage] <PackageVersion[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Remove-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]

Syntax

Remove-AppvServerPackage [-Name] <string> [[-Version] <string>] [-WhatIf] [-Confirm] [<CommonParameters>]

Remove-AppvServerPackage [-AppvServerPackage] <PackageVersion[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Remove-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]

Description

Parameters

Parameter :**AppvServerPackage**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**PackageID**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Set-AppvServerConnectionGroup

Synops

```
Set-AppvServerConnectionGroup [-Name] <string> [[-Version] <int>] [[-AppvServerPackage] <PackageVersion[]>] [-Priority <uint32>] [-Order <int[]>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Set-AppvServerConnectionGroup [-AppvServerConnectionGroup] <SerializableConnectionGroup> [[-AppvServerPackage] <PackageVersion[]>] [-Priority <uint32>] [-Order <int[]>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Set-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID] <guid>] [[-AppvServerPackage] <PackageVersion[]>] [-Priority <uint32>] [-Order <int[]>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Syntax

```
Set-AppvServerConnectionGroup [-Name] <string> [[-Version] <int>] [[-AppvServerPackage] <PackageVersion[]>] [-Priority <uint32>] [-Order <int[]>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Set-AppvServerConnectionGroup [-AppvServerConnectionGroup] <SerializableConnectionGroup> [[-AppvServerPackage] <PackageVersion[]>] [-Priority <uint32>] [-Order <int[]>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Set-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID] <guid>] [[-AppvServerPackage] <PackageVersion[]>] [-Priority <uint32>] [-Order <int[]>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerConnectionGroup**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**AppvServerPackage**

Required	false
Position	2
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**GroupID**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Order**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Priority**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Set-AppvServerConnectionGroupPackage

Synops

```
Set-AppvServerConnectionGroupPackage [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [[-AppvServerPackage] <PackageVersion>] [-
PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-
PackageVersionID <guid>] [-Optional <bool>] [-UseAnyPackageVersion <bool>] [-Order
<int>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Set-AppvServerConnectionGroupPackage [-ConnectionGroupName] <string> [[-
ConnectionGroupVersion] <int>] [[-AppvServerPackage] <PackageVersion>] [-
PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-
PackageVersionID <guid>] [-Optional <bool>] [-UseAnyPackageVersion <bool>] [-Order
<int>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Set-AppvServerConnectionGroupPackage [-ConnectionGroupID] <guid> [[-
ConnectionGroupVersionID] <guid>] [[-AppvServerPackage] <PackageVersion>] [-
PackageName <string>] [-PackageVersion <string>] [-PackageID <guid>] [-
PackageVersionID <guid>] [-Optional <bool>] [-UseAnyPackageVersion <bool>] [-Order
<int>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Syntax

```
Set-AppvServerConnectionGroupPackage [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [[-AppvServerPackage]
<PackageVersion>]
    [-PackageName <string>] [-PackageVersion <string>] [-
PackageID <guid>] [-PackageVersionID <guid>] [-Optional <bool>]
[-UseAnyPackageVersion
    <bool>] [-Order <int>] [-WhatIf] [-Confirm]
[<CommonParameters>]
```

```
Set-AppvServerConnectionGroupPackage [-ConnectionGroupName]
<string> [[-ConnectionGroupVersion] <int>] [[-AppvServerPackage]
<PackageVersion>]
    [-PackageName <string>] [-PackageVersion <string>] [-
PackageID <guid>] [-PackageVersionID <guid>] [-Optional <bool>]
[-UseAnyPackageVersion
    <bool>] [-Order <int>] [-WhatIf] [-Confirm]
```

[<CommonParameters>]

```
Set-AppvServerConnectionGroupPackage [-ConnectionGroupID] <guid>
[[-ConnectionGroupVersionID] <guid>] [[-AppvServerPackage]
<PackageVersion>]
    [-PackageName <string>] [-PackageVersion <string>] [-
PackageID <guid>] [-PackageVersionID <guid>] [-Optional <bool>]
[-UseAnyPackageVersion
    <bool>] [-Order <int>] [-WhatIf] [-Confirm]
[<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerConnectionGroup**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**AppvServerPackage**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupID**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupName**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupVersion**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**ConnectionGroupVersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Optional**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Order**

Required	false
----------	-------

Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageID**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageName**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageVersion**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**PackageVersionID**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**UseAnyPackageVersion**

Required	false
Position	Named
Default value	

Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Set-AppvServerPackage

Synops

```
Set-AppvServerPackage [-AppvServerPackage] <PackageVersion> [[-Groups] <string[]>]
[[-DynamicDeploymentConfigurationPath] <string>] [[-DynamicUserConfigurationPath]
<string>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Set-AppvServerPackage [-Name] <string> [[-Version] <string>] [[-
DynamicDeploymentConfigurationPath] <string>] [[-DynamicUserConfigurationPath]
<string>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Set-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>] [[-
DynamicDeploymentConfigurationPath] <string>] [[-DynamicUserConfigurationPath]
<string>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Syntax

```
Set-AppvServerPackage [-AppvServerPackage] <PackageVersion> [[-
Groups] <string[]>] [[-DynamicDeploymentConfigurationPath]
<string>]
    [[-DynamicUserConfigurationPath] <string>] [-WhatIf] [-
Confirm]    [<CommonParameters>]
```

```
Set-AppvServerPackage [-Name] <string> [[-Version] <string>] [[-
DynamicDeploymentConfigurationPath] <string>] [[-
DynamicUserConfigurationPath]
    <string>] [-WhatIf] [-Confirm]    [<CommonParameters>]
```

```
Set-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>]
[[-DynamicDeploymentConfigurationPath] <string>] [[-
DynamicUserConfigurationPath]
    <string>] [-WhatIf] [-Confirm]    [<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerPackage**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**DynamicDeploymentConfigurationPath**

Required	false
Position	2
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**DynamicUserConfigurationPath**

Required	false
Position	3
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Groups**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**PackageID**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Unpublish-AppvServerConnectionGroup

Synops

```
Unpublish-AppvServerConnectionGroup [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Unpublish-AppvServerConnectionGroup [-Name] <string> [[-Version] <int>] [-WhatIf] [-
Confirm] [<CommonParameters>]
```

```
Unpublish-AppvServerConnectionGroup [-GroupID] <guid> [[-VersionID] <guid>] [-
WhatIf] [-Confirm] [<CommonParameters>]
```

Syntax

```
Unpublish-AppvServerConnectionGroup [-AppvServerConnectionGroup]
<SerializableConnectionGroup> [-WhatIf] [-Confirm]
[<CommonParameters>]
```

```
Unpublish-AppvServerConnectionGroup [-Name] <string> [[-Version]
<int>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Unpublish-AppvServerConnectionGroup [-GroupID] <guid> [[-
VersionID] <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerConnectionGroup**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**GroupID**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Unpublish-AppvServerPackage

Synops

Unpublish-AppvServerPackage [[-Name] <string>] [[-Version] <string>] [-WhatIf] [-Confirm] [<CommonParameters>]

Unpublish-AppvServerPackage [-AppvServerPackage] <PackageVersion[]> [-WhatIf] [-Confirm] [<CommonParameters>]

Unpublish-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]

Syntax

```
Unpublish-AppvServerPackage [[-Name] <string>] [[-Version] <string>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Unpublish-AppvServerPackage [-AppvServerPackage] <PackageVersion[]> [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Unpublish-AppvServerPackage [-PackageID] <guid> [[-VersionID] <guid>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerPackage**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	false
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**PackageID**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**VersionID**

Required	false
Position	1
Default value	
Accept pipeline input?	true (ByValue, ByPropertyName)
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Cmdlet: Update-AppvServerConnectionGroup

Synops

```
Update-AppvServerConnectionGroup [-AppvServerConnectionGroup]  
<SerializableConnectionGroup> [-WhatIf] [-Confirm] [<CommonParameters>]
```

```
Update-AppvServerConnectionGroup [-Name] <string> [[-Version] <int>] [-WhatIf] [-  
Confirm] [<CommonParameters>]
```

Syntax

```
Update-AppvServerConnectionGroup [-AppvServerConnectionGroup]  
<SerializableConnectionGroup> [-WhatIf] [-Confirm]  
[<CommonParameters>]
```

```
Update-AppvServerConnectionGroup [-Name] <string> [[-Version]  
<int>] [-WhatIf] [-Confirm] [<CommonParameters>]
```

Description

Parameters

Parameter :**AppvServerConnectionGroup**

Required	true
Position	0
Default value	
Accept pipeline input?	true (ByValue)
Accept wildcard characters?	

Parameter :**Confirm**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Name**

Required	true
Position	0
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**Version**

Required	false
Position	1
Default value	
Accept pipeline input?	false
Accept wildcard characters?	

Parameter :**WhatIf**

Required	false
Position	Named
Default value	
Accept pipeline input?	false
Accept wildcard characters?
